## TECHNICAL SKILLS

**Languages:** Java, Python, JavaScript (ES6+), HTML5, CSS3, SQL

**Frontend & Design:** React.js, Framer (Low-Code/Visual Builder), Responsive Web Design, UI/UX Principles, Graphic Design (Poster & Newsletter Creation)

**Backend & Core:** Java Full Stack, MERN Stack (Node.js, Express), RESTful APIs, Linux (Shell Scripting/User Management)

**Tools & Platforms:** Git, GitHub, Print on Demand (POD) Workflows, IoT Systems, VS Code

## PROFESSIONAL SUMMARY

Creative **Frontend Developer** combining MERN stack and Java expertise with professional graphic design skills. Proven track record leading visual strategy for Google Developer Groups (GDG) events with **300+ attendees**. Focused on building responsive, user-centric interfaces using **React.js** and **Framer**.

## PROFESSIONAL EXPERIENCE

- Graphic Design Team Member** Nov 2025 – Present  
*Google Developer Groups (GDG) on Campus — Asansol Engineering College* Asansol, WB
- Designed and deployed **high-impact visual assets** for community events, contributing to a 48-hour "Cloud Sprint" that secured **300+ registrations**.
  - Spearheaded the visual identity for the monthly newsletter, curating designs for top tech news stories tailored to a **Gen Z audience**.
  - Collaborated with the core team to produce promotional materials for technical workshops, ensuring **consistent branding** across social media platforms.

## PROJECTS

- S.P.A.R.K. | Event Organizer | Event Management, Visual Design** Jan 2026
- Orchestrated the end-to-end **digital strategy** for the event launch, successfully securing **100+ registrations** within the initial phase through targeted visual campaigns.
  - Established a **cohesive brand identity** by designing high-impact promotional assets, ensuring consistent messaging across social media channels.
- Cloud Study Jams & 48-Hour Cloud Sprint | Design Lead | Graphic Design** Nov 2025
- Spearheaded the visual infrastructure for a **300+ attendee event**, creating all digital collateral including newsletters, banners, and instructional guides.
  - Facilitated a 48-hour intensive "Cloud Sprint," managing real-time communication and visual updates that sustained **high participant retention**.
- Interactive Personal Portfolio | Frontend Developer | Framer, React Principles** Mar 2025 – Present
- Engineering a responsive web platform using **low-code architecture (Framer)** to demonstrate proficiency in modern layout systems, visual hierarchy, and mobile optimization.
  - Integrating **intuitive UI/UX patterns** to present complex case studies (such as IoT trend analysis and full-stack development), enhancing accessibility for recruiters.
- Tech Newsletter Modernization | Creative Director | Adobe Creative Suite** Nov 2025
- Revamped the visual layout of the monthly newsletter, synthesizing top 3 tech news stories into **digestible, visually rich formats** that increased readership.
  - Optimized content delivery by combining **technical accuracy** with compelling graphic design, bridging the gap between complex industry news and student accessibility.

## EDUCATION

- Asansol Engineering College** 2023 – 2027 (Expected)  
*B.Tech in Computer Science* West Bengal, India
- Coursework:** Full Stack Development, Ind. Management, Operating Systems (Linux Labs), IoT.
  - Focus:** Analyzed industrial management trends; conducted lab research in **CPU scheduling & OS user management**.
